

“What I really love about FastMaint is it's like Microsoft Outlook™, all that I need is in this one program meaning I don't have to open a bunch of windows to get what I want. Great programming!” (Frank Doyle)

About FastMaint™

FastMaint is computerized maintenance management software for small to mid-size maintenance teams. Fast to set up and use, it is an affordable solution for organizations of all sizes.

FastMaint is available in four different editions. Three of these editions are installed on your computer(s) (requires Microsoft Windows); Standard (single user), Professional (multi-user) and Web (multi-user). The fourth edition FastMaint Cloud is hosted and managed by us.

FastMaint Web & Cloud are used with a web browser on a computer, tablet and many smart phones.

Need help with maintenance management?

FastMaint can help manage preventive & planned maintenance of equipment and facilities. Improve the quality of maintenance systems while reducing the costs of labor and materials and increasing asset life. An easy to use interface helps users become productive quickly.

Useful features to help you

Track and estimate labor costs, material costs and inventory needs. Import/ export data from comma delimited files/ spreadsheets. Define global or individual working calendars with days off and holidays. Detect schedule conflicts and reduce overtime costs. Plan maintenance for any given period, email/ print work orders and collect feedback. Use work order history to find problem patterns and more.

FastMaint comes with a built-in Microsoft Jet™ (Access) database so many third party tools such as report writers, data extraction utilities and so on can extract information and integrate with it.

FastMaint Professional adds additional features, multi-user support and the option of using Microsoft SQL Server™ for your maintenance database.

FastMaint Web is the web browser based version of FastMaint that can be run on Microsoft’s Internet Information Server. *(For a list of major features see next page)*

Many maintenance scheduling options

How much does FastMaint cost?

FastMaint is available for a one-time fee starting at US\$ 2200* (Standard edition) or a monthly subscription (Cloud edition).

Customer Quotes

We are very pleased with your product. I am learning more about its versatility each day. I have been able to see a downward trend in equipment break downs and spare parts usage.

David C., Maintenance Planner

Excellent software, it has made a definite impact on the day to day running of my department.

Mick H., Engineering Supervisor

I have been using FastMaint for about 10 yrs and do like this program

Kenneth G., Head Operator Water Recovery Plant
